-- The MAILING DATE of this communication appears on the cover sheet with the correspondence address --  
Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) OR THIRTY (30) DAYS, WHICHEVER IS LONGER, FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

1. Claims 11-17 stand withdrawn from further consideration pursuant to 37 CFR 1.142(b), as being drawn to a nonelected species, there being no allowable generic or linking claim. Applicant timely traversed the restriction (election) requirement in the reply filed on August 10, 2006.

It should be noted that the traversal is considered to be a moot point in that applicant will be give consideration of the nonelected species upon the allowance of, a generic independent claim as previously noted.

2. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

3. Claims 1 and 18 are rejected under 35 U.S.C. 103(a) as being unpatentable over Tanigawa et al. (U. S. Pat. No. 6,032,494) in view of either Schrage et al. (U. S. Pat. No. 4,000,968), Munz (U. S. Pat. No. 1,805,782) or Miller et al. (U. S. Pat. No. 1,401,176) .  
Re claims 1 and 18, Tanigawa is cited disclosing a washing water circulation apparatus comprising a circulation motor/pump/hose (95, see fig. 11 for example) and an injection unit (not shown) including a connector (242) penetrating a gasket, that differs from the claim only in the recitation of the injection including a nozzle, with the nozzle being opened in a direction the drum, and being completely opened at the left and right sides. The patents to Schrage, Munz and Miller are each cited that it is old and well known to provide a dispersion nozzle being opened at the front and sides, for dispersion a washing fluid as claimed. It therefore would have been obvious to one having ordinary

skill in the art to modify the arrangement of Tanigawa, to include a dispersion nozzle arrangement as taught by either Schrage, Munz or Miller, for the purpose of ensuring for the complete wetting of the article being washed.

4. Claims 2-6, 9 and 19 are rejected under 35 U.S.C. 103(a) as being unpatentable over the applied prior art as applied to claims 1 and 18 above, and further in view of Germany'583 (Germany 38 11 583).

Claim 2 defines over the applied prior art only in the recitation of the annular for supporting the connector. Germany583 discloses the annular rib as claimed (see fig. 2-6). It therefore would have been obvious to one having ordinary skill in the art to modify the device of Tanigawa, to include a rib as taught by Germany'853, for the purpose of providing a degree of rigidity to the gasket. Re claim 3, Germany'583 discloses the projection on the connector as claimed (see fig. 2). Re claim 4, to have the body in the form of a single body is deemed to be of little patentable weight in view of the corresponding structure in the applied prior art. Re claims 5, 19, Schrage, Munz and Miller discloses the upper, vertical and lower parts as claimed. Re claims 6-10 and 20-24, Munz discloses the upper and horizontal features as claimed.

5. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure. In Severns et al., Kinealy, Valent, Reed, Stick et al., Fanson, Toma, Brenner et al., Garman, Breckenridge, Germany'079, Kreitchman, Guth, Osterhus et al. and Lohman, note the sprinkling and circulation means.
